Grease Duct Access Doors

To Our Great Line Of Grease Containment Products

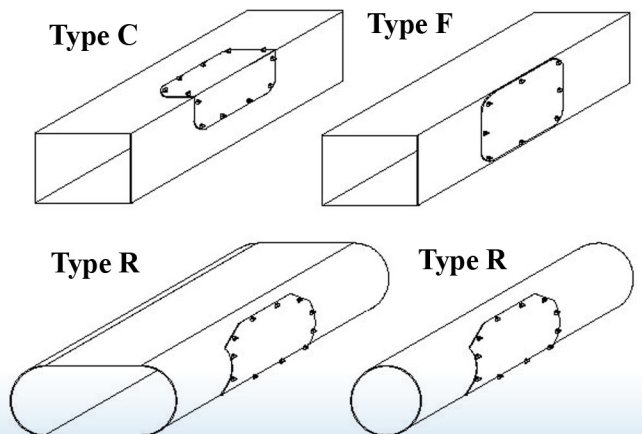

DuraSystems grease duct access doors are UL and cUL listed and available in various sizes & shapes.

The door offers a grease and air tight gasket system that meets or exceeds all NFPA 96 and mechanical code requirements.

The doors are available in stainless and carbon steel to match the grease duct materials.

Features:

- Quick installation
- No measuring (cut-around template provided).
- No frame to install and seal.
- Zero protrusion in air stream
- Door is completely removable for cleaning
- Effortless opening and closing. No tools required
- Specialized Gasket.
- No welding required.
- Can be used with zero clearance insulation systems

Patent No. 2357078
